Robert Kitto - Float Lantern Lighting Fixture Installation Instructions

Components

1x Robert Kitto Float Lantern

1x Robert Kitto Float Lantern Shade (included)

1x Catenary Wire (not included)

2x Fixing Screws

Globe(s) (not included)

Assembly Instructions

1. Have licensed electrician provide lighting point in location as instructed by customer.
2. Provide large hole for brass rod and two fixing holes in ceiling surface (use ceiling canopy as guide), levelled as per instruction from customer. Provide and install plugs (as required) into two drilled fixing holes.
3. Secure hangar attached to top of brass rod to structural element within ceiling using a suitably strong support (such as a catenary wire). Feed suspension rod through drilled hole. Suspend fitting at appropriate height.
4. Have licensed electrician connect and terminate the live, neutral and earth conductors using the connectors provided. Termination to be concealed within ceiling canopy. Electrician to test fitting and cable terminations and issue CoC.
5. Align ceiling canopy with (plugged) holes in mounting surface and tightly install fixing screws. Secure canopy screw such that fixture is suspended at appropriate height.
6. Install globe(s) (max 60W) - not included.
7. Place shade ring over shade and use three hanging chains to support the shade ring.
