Robert Kitto - Hanging Lantern Lighting Fixture Installation Instructions

Required Components

1x Robert Kitto Hanging Lantern

1x Ceiling Canopy

2x Fixing Screws

Glass Panels

Globe(s) (not included)

Assembly Instructions

1. Have licensed electrician provide lighting point in location as instructed by customer.
2. Provide large hole for brass rod and two fixing holes in ceiling surface (use ceiling canopy as guide), levelled as per instruction from customer. Provide and install plugs (as required) into two drilled fixing holes.
3. Secure hangar (attached to top of brass rod) to structural element within ceiling using a suitably strong support (such as a catenary wire). Feed suspension rod through drilled hole, lock rod in place using canopy screw. Suspend fitting at appropriate height.
4. Have licensed electrician connect and terminate the live, neutral and earth conductors using the connectors provided. Conceal termination behind ceiling canopy. Electrician to test fitting and cable terminations and issue CoC.
5. Align canopy with plugged holes in mounting surface and tightly install fixing screws.
6. Install globe(s) (max 60W) - not included.
